Refunds Policy

Version: 1.1 **Effective:** 2026-01-01

IMPORTANT: Synthetic educational policy. Not a real company's terms.

Purpose and scope

This synthetic policy explains refunds for fictional Northstar Retail purchases.

Refund initiation

A refund may be initiated only after an eligible return has been received and inspected, or after an authorized support decision records an exception.

Refund destination

Approved refunds are sent to the original payment method. Support must not request or store full payment-card numbers, passwords, or one-time passcodes.

Processing time

After approval, allow 5–10 business days for the payment provider or bank to display the refund. The exact posting time is outside the retailer's control.

Refund status

Use the operational refund status if available. If no refund record exists, say that no refund has been recorded; do not claim that a refund has been issued.
